

PT100S Lab Practical Rubric

Student Name: _____

Category	Score	Competent	Acceptable	Unacceptable	Failure
Communication Introduces self Gives clear instructions		Appropriately Introduces self to patient. Explains to mock patient what to expect for session; asks permission before beginning activities. Uses layman's terms in a voice that is appropriate in volume. Makes eye contact with patient. Exhibits appropriate verbal and nonverbal communication throughout. (3)	Introduction and explanations adequate, but incomplete or unclear at times. Appears comfortable with communication but makes a 1-3 errors. Uses jargon infrequently. Volume may be too loud or too soft. (2)	Introduction and explanations inadequate. Uses jargon frequently. (1)	Introduction and explanations inadequate. Uses jargon frequently. Minimal interaction with patient. Exhibits overall lack of comfort with communication. Volume inappropriate. (0)
Professionalism		Demonstrates maturity and confidence in skills. Executes entire patient scenario with poise and self-assurance. (3)	Demonstrates maturity through most of session. Some lack of confidence noted. (2)	Cues required for student to demonstrates maturity through most of session. Lack of confidence noted. (1)	Demonstrates lack of maturity and confidence much of the time. Unprofessional in language or mannerisms. (0)
Safety Awareness Must score <u>3</u> to pass exam		Able to correctly recognize, perform and verbalize all safety precautions (3)			Demonstrates questionable understanding of safety precautions. Unable to recognize safety issues without cues. (0)
Infection Control		Correctly performs and maintains infection control procedures throughout the entire session without cues. (3)	Able to self-correct any lapses in infection control before said lapse impacts mock patient. (2.5)	Requires cue to correct lapses in infection control process – before patient contact (1)	Violates infection control procedures. (0)
Body Mechanics		Correctly applies the principles of body mechanics without cues. (3)	Able to self-correct any lapses applying the principles of body mechanics before lapse involves mock patient. (2.5)	Requires cue to correct lapses in body mechanics (1)	Violates principles of body mechanics during patient care (0)
Positioning of mock patient		Correctly positions mock patient to assure: Patient comfort Patient privacy and Freedom from pressure areas Without cues. (3)	Able to self-correct any lapses positioning patient prior to leaving patient in a given position. (2.5)	Requires cue to correct lapses positioning patient prior to leaving patient in each position (1)	Does not self-correct lapses positioning patient prior to leaving patient in a given position. (0)
Vital Signs		Correctly takes and records requested vital signs of mock patient without cues. (3)	Able to self-correct any lapses that occur while taking and recording requested vital signs of mock patient. (2.5)	Requires cue to correct lapses while taking and recording requested vital signs of mock patient. (1)	Unable to correctly take and record requested vital signs of mock patient. (0)

Transfers		Correctly instructs, demonstrates, positions and guards mock patient during requested transfer without cues. (3)	Able to self-correct any lapses that occur while instructing, demonstrating, positioning and guarding a mock patient during requested transfer without cues. (2.5)	Requires cue to correct lapses while instructing, demonstrating, positioning and guarding a mock patient during requested transfer without cues. (2)	Unable correctly instruct, demonstrate, position and guard a mock patient during requested transfer without cues. (0)
Gait		Correctly performs the following without cues: 1. Chooses correct AD 2. Instructs, demonstrates the correct gait pattern to match weight bearing status 3. Guards mock patient for requested gait activity. (3)	Able to self-correct any lapses performing the following without any compromise to patient safety. 1. Chooses correct AD 2. Instructs, demonstrates the correct gait pattern to match weight bearing status 3. Guards mock patient for requested gait activity. (2.5)	Requires cue to correct lapses while performing the following without any compromise to patient safety. 4. Chooses correct AD 5. Instructs, demonstrates the correct gait pattern to match weight bearing status 6. Guards mock patient for requested gait activity. (2)	Unable to perform the following thus compromising patient safety. 1. Chooses correct AD 2. Instructs, demonstrates the correct gait pattern to match weight bearing status 3. Guards mock patient for requested gait activity. (0)

Total Score: ____ / 27. 90% (24/27) required, with all lab skills in bold being passed, to successfully complete this practical.

Comments:

Student Self-Assessment: How I will prepare to enhance my competence and confidence.
